

**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Name suppressed

Date Received: 30 August 2019

Partially
Confidential

WE need to recycle all water and not dump it out to sea. Canberra, Albury and Wagga are examples of cities that do recycle their water. Why do the governments do what the shock jocks and the ignorant say, and do the right thing for the environment. I doubt that we in Sydney would ever have a water shortage if we recycled. And therefore we would not need to even consider to raise the a dam and do the subsequent environment damage that will follow.
