**INQUIRY INTO URANIUM MINING AND NUCLEAR  
FACILITIES (PROHIBITIONS) REPEAL BILL 2019**

**Name:** Mr Paul Harris  
**Date Received:** 27 August 2019

---

Hi I am writing to put forward my approval of the go ahead of nuclear power plants as it is clean and efficient,I was a miner for 40 years and forced from my home due to the mines expansion which put in our back yard you can not live with noise,dust ,blasting, devaluation of properties lose communities.

I also am a big fan of geothermal power which is not talked about even cleaner and as efficient .

I am afraid coal power fired stations are like steam trains we have to move forward and I believe nuclear or geothermal is the way to go .

As far as jobs go i afraid technology is making us humans redundant we will be there in construction but as plants develop we are no longer needed .

Thank you for letting me have a say.
