

**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Name suppressed

Date Received: 1 September 2019

Partially
Confidential

Deeper thought through solutions could be done to resolve the matter of the dam's capacity under heavy rains.

If you are serious about flood mitigation, get the engineers and planners to work together to achieve a smarter solution with out causing extensive damage and limited access/inundation to indigenous lands and flooding ecosystems.

Diversion flow wells with valves etc reduces the footprint and enables increase capacity under flash flooding.
