**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Mr Roman Bures
Date Received: 5 September 2019

Australia ,Sydney, has plenty of water that can be utilised smartly with desalination which the government spent a fortune on already.

More investment should be made in grey water usage. By giving government grants for greywater instead of water tanks when it hardly rains.

Also covering and relining open channels that were built by convicts that carry water for 100s of kilometers in open channels within 2 meters of residential properties when a member of the public can NOT enter a water catchment area.

Sydney does NOT need a bigger dam it needs to work smarter with the water it has!!!!
