**INQUIRY INTO PROPOSAL TO RAISE THE
WARRAGAMBA DAM WALL**

Name: Name suppressed

Date Received: 31 August 2019

Partially
Confidential

Respect world heritage sites. Respect the needs of ecosystems. Stop the greed and mass property development. If you really cared about housing, you would improve the standards so that homes were properly insulated, built with solar PV, and had additional heat resistant components, but no, crappy ikea homes keep getting built. The blue mountains needs to be protected, and we have no right to continue to desecrate the limited amount of national parks that we have left.
