

**Submission  
No 311**

**INQUIRY INTO PROPOSAL TO RAISE THE  
WARRAGAMBA DAM WALL**

**Name:** Ms Monica Holm

**Date Received:** 9 September 2019

---

It just doesn't make any sense. An area that the world recognises as significant must be protected. There is no other option. We risk another loss of species, the beautiful Regent Honeyeater and we once again shamefully disregard our first people's connection to the land. The flood mitigation argument isn't even logical, give that there are other catchments contributing to the flooding of this area anyway.
