

**INQUIRY INTO SYDENHAM-BANKSTOWN LINE
CONVERSION**

Name: Name suppressed
Date Received: 17 September 2019

Partially
Confidential

It is essential that the Sydnam-Bankstown leg of the metro be completed so that the residents in these and surrounding suburbs have access to the metro system as a transportation option. Residents in these areas should have the metro system service so that transport can be easier, less crowded, more readily available, reaching more suburbs in modern comfort. This leg of the metro will be servicing a huge and growing number of residents and it is crucial that this area does not lag behind with improvements to public transport options. It will be equitable for residents in these areas to have access to the metro system as have residents in other areas around Sydney. As a non driver, access to the metro will be of great benefit to me and many other non drivers, elderly, young people and workers. It is crucial that the metro system go ahead in Sydenham to Bankstown.
