

**INQUIRY INTO SYDENHAM-BANKSTOWN LINE
CONVERSION**

Name: Name suppressed

Date Received: 31 August 2019

The cost involved to replace an existing heavy rail line with the Metro rail could be better spent on another transport project where there is no existing rail infrastructure e.g. The Northern beaches or other areas of the western suburbs. The Sydenham-Bankstown is well utilised and double decker trains are more suited for the population density. What a waste of money!!
