BILL 2019**

Legislation banning the exposure of animal cruelty, and protecting those who abuse animals, is abhorrent. As a society we expect people to treat animals in their care with respect, dignity and to provide them with a life free from abuse. This should not be any different because animals are being farmed for food. Sadly there is overwhelming evidence this is not happening. Enacting laws to hide the widespread abuse and cruelty in animal agriculture isn't fooling anyone and only raises questions about the honesty and integrity of our current administration. These laws are manifestly unjust, they protect the abuser and only serve to turn us against the government and those who hide behind this legislation. Please see reason and throw these laws out.
