**INQUIRY INTO URANIUM MINING AND NUCLEAR
FACILITIES (PROHIBITIONS) REPEAL BILL 2019**

Name: Mrs Shannon Blackmore

Date Received: 30 September 2019

For the following reasons I believe that no new nuclear facilities, other than for medicinal purposes, should be constructed in NSW:

1. Experiences of other countries show that the economic, environmental and health risks are unalterable
2. Renewable energy sources provide an alternative energy source without the risk to people and environment
3. The waste from nuclear facilities is difficult to dispose of and presents a long term environmental risk
4. The long lead time on the construction of nuclear power plants doesn't make them an appropriate alternative to assist in the decarbonisation of our economy.
