Ga Ga laws against animal activists

Dear Sir

,I would like to express my fear that passing a goal sentence /heavy fines on animal activists is not appropriate .I think that farming practices have to change as animal welfare legislation is well overdue in Australia.People are asking about how and where animals are in the food chain and demanding more humane methods be introduced in the production of food .

If this is not exposed, then the population will remain ignorant of some of the abhorrent farming practices of today especially in the factory farming of pigs and chickens .

Please ,our goals are already overcrowded and stopping these activists will only lead to more determination on their part
