No 88**

## **INQUIRY INTO SYDENHAM-BANKSTOWN LINE CONVERSION**

**Name:** Mr Michael Katz

**Date Received:** 13 October 2019

---

As a landowner in Canterbury I am sick of being told that the community does not want the Metro. We do want it and we have demonstrated that through our groups and countless submissions.

We feel that the amended final approval which respects the local character of the stations and reduces closures shows that the Metro Authority listened through the consultation process, and we ask that the arguing be finished and just proceed with the delivery and construction of the Metro.

I understand that people are afraid of change, as they always are for new major infrastructure, but we ask that our area not be left behind and are a part of the infrastructure growth in Sydney and keep us connected to future jobs, education and housing.
