Partially  
Confidential

I urgently recommend that a full investigation is undertaken into the coal ash dam at Eraring Power Station in NSW.. Not only does it impact the health of people in the community it is slowly but surely polluting a beautiful State asset, Lake Macquarie. On 17 Oct 2019 toxic ash was seen and photographed from across the Lake rising in the wind and blanketing surrounding areas. Act now, put a hold on your expansion approval for this dam until Origin Energy can fix the current dam. At least review the recommendations in this report so we can have some faith that our politicians are doing something about the health of our community.
