## Submission

I would like to express my opinion on GOVERNMENT TAKE BACK The plate

With reasonable compensation for the damages for plate market Value and the suffering been through for the last 5 years since Uber started

THE PLATE MARKET VALUE REACHED \$475,000 and now worth nothing 0 because people now using Uber and drivers now prefer to drive Uber

And me and lots of people lost their property as guarantee for bank loan which they lost their property as well

Even last month the plate contract was \$1265 a month the CAB13 paid \$500 and said don't expect to get any for the following months is not even cover the payment of the loan \$950 a month. And said come and have look lots of taxis standing in base no one wants to work.

So I am asking the government to pay back the plate and compensation based on market value before Uber started which \$475000!!!!!!!!!!!!

Thank you
