**INQUIRY INTO GOVERNMENT'S MANAGEMENT OF THE
POWERHOUSE MUSEUM AND OTHER MUSEUMS AND
CULTURAL PROJECTS IN NEW SOUTH WALES**

Name: Mr Stephen Borg

Date Received: 14 May 2020

I request that all heritage buildings on the proposed Powerhouse Museum site be completely saved as part of the overall structure in their original form

I request that all the trees on the site be saved

The building will house our heritage and it is totally inappropriate that heritage be destroyed to do this

The heritage architecture affected is inherently a part of the heritage fabric of all Parramatta, as the birthplace of our nation. Each loss of even a tiny bit of heritage is significant

This heritage is important not only to the people of Parramatta and Australians generally, but important for future Australians . Future Australians and People who will make Australia their new home will NEED to be able to connect to heritage to understand The culture of Australia. This will be difficult if all they have is a plaque that denotes where something used to be, or see part of it in a museum

Please consider saving the heritage properties that are currently slated for demolition
