I would like to object to the bill to amend the Firearms act

This bill would make anyone who runs a machine shop or sells metal pipe a potential criminal. Home work shops that have a lathe or milling machines could be seen as a criminal offence. Books and computers containing diagrams or photos of firearms used by collectors or those that have an interest in the design or history of firearms are liable for prosecution. This bill would also make it an offence to repair or make adjustments to your own firearms even dismantling and cleaning the firearm could be an offence. I recommend that this legislation be put into the bin.
