I believe in anti speciesism. Humans and non human animals have equal rights to live on this planet. It is immoral to exploit or harm animals just because they belong to a different species. It is infact our moral duty to protect the voiceless animals and be their voice. They are defenceless so we need to defend them from abuse and exploitation. Humans are instrumental in destroying their habitats and killing them for their own interests. Animal farming in all ways needs yo be stopped and banned.
