**INQUIRY INTO LONG-TERM SUSTAINABILITY OF THE
DAIRY INDUSTRY IN NEW SOUTH WALES**

Name: Miss Miriam Cooper

Date Received: 11 August 2020

The dairy industry needs a total overhaul. It's inherently very cruel and significantly contributes to climate change. People need to consume alternatives eg soy, oat, almond liquid etc. There are many non-dairy alternatives which don't cause any animal suffering and don't inflict havoc on the environment. We need action and major changes in all industries which cause animal suffering and climate change.
