**INQUIRY INTO LONG-TERM SUSTAINABILITY OF THE
DAIRY INDUSTRY IN NEW SOUTH WALES**

Name: Mr Matthew Stellino

Date Received: 11 August 2020

The dairy industry is the shame of a bygone era, one of ignorance from the consumers & a lack of understanding from the farmers as to the negative impacts caused by their actions.

The exploitation of animals and the environmental destruction that is modus operandi for the dairy industry can no longer be tolerated by a society that values animals and our natural resources.

The dairy industry like any other industry should not be given government handouts. If it can not survive in a free market than it is not required by that market.
