

**INQUIRY INTO LONG-TERM SUSTAINABILITY OF THE
DAIRY INDUSTRY IN NEW SOUTH WALES**

Name: Mr Don Pezzano

Date Received: 14 August 2020

There is nothing sustainable about the dairy industry. Massive amounts of water usage, waste run off, ethical issues. This country does not have so much water we can waste on an unsustainable industry. Land degradation, loss of habitat of native animals and greenhouse gas emissions are all linked to a dying industry.
