**INQUIRY INTO RATIONALE FOR, AND IMPACTS OF,  
NEW DAMS AND OTHER WATER INFRASTRUCTURE IN  
NSW**

**Name:** Mr Michael Davey  
**Date Received:** 13 September 2020

---

Mole river has vast indigenous cultural heritage in this area of the border rivers . Besides the fact that the endangered purple spotted gudgeons last wild population thrives here . Mole river dam will never help Tenterfields water security that was so threatened in the last drought . Water rights will be sold to the highest bidder upstream as is the same on the Dumaresq river from the glen Lyon dam.

Cold water pollution effects the native fish breeding . This dam is wrong on many levels , cultural , endangered species and just pure greed as water is a commodity. Funny how the mole river hasn't flowed for two years but during testing of the EIS purple spotted gudgeon and indigenous sights have been found .
