

**INQUIRY INTO LONG-TERM SUSTAINABILITY OF THE
DAIRY INDUSTRY IN NEW SOUTH WALES**

Name: Mrs Tygalily Keeley

Date Received: 12 September 2020

I believe the government is draining our livelihoods by pressuring & convincing our companies that it is better to send business offshore & support slavery, child labour & political corruption.

We need to bring industry back to Australia! Give jobs to Australians! Put finance back into Australia! Stop selling raw products & only sell finished product.

The dairy industry is going in the same direction as the steel mills, cotton/wool fabric mills, meat processing, clothing factories, etc etc etc.

It is retarded to close factories & employment but let the population expand with the majority going into study or bleeding the government dry by going on the dole or indiscriminate breeding.

This has been my belief for decades, it's a pity the Australian government is so weak.
