**INQUIRY INTO RATIONALE FOR, AND IMPACTS OF,
NEW DAMS AND OTHER WATER INFRASTRUCTURE IN
NSW**

Name: Name suppressed
Date Received: 22 September 2020

Partially
Confidential

The Lower Lachlan lakes System (the great Cumbung swamp) is detrimental to the survival of an important group of birds, Fish, Reptiles and Mammals. Water security is vital for their survival & without it their future is and will remain uncertain! With the increasing impacts of Climate change it is our obligation to ensure this ecosystem remains in place, If this means it can be achieved through human intervention I believe and support Raising of the Wyangala Dam wall.
