**INQUIRY INTO RATIONALE FOR, AND IMPACTS OF,
NEW DAMS AND OTHER WATER INFRASTRUCTURE IN
NSW**

Name: Mr Alexander Keeble

Date Received: 22 September 2020

There is no need for further dams. We cannot expect to see long term benefits from this sort of infrastructure. Short term, potentially, long term, a significant no. Decline in habitat, environmental health, migratory fish, water flows that will impact Country above and below the dam, etc. You know these things. Get your hands out of your deep pockets and think long term, think changing other actions so we don't need to rely on MORE infrastructure, think more simple, live more simply. It is a privilege that we and you must acknowledge, otherwise you are guilty of feeding environmental and human health decline.
