**INQUIRY INTO HEALTH OUTCOMES AND ACCESS TO
HEALTH AND HOSPITAL SERVICES IN RURAL,
REGIONAL AND REMOTE NEW SOUTH WALES**

Name: Mr Thornton Brown
Date Received: 26 November 2020

Sir/Madam

As we live in the country for years our Health Services are declining and there's too much put on our Health workers

We need to improve in doctors coming to regional areas also the nurses there's too much responsibility put on nurses for being in a safe working area also the short on nurses On ONE DOCTOR In Wellington Hospital what works 7 / 24 For seven days a week IS NOT SAFE FOR DOCTORS OUR PATIENTS WE NEED ONE MORE DOCTOR 7/24.

My Partner had a Potassium reading that was very high and had to go in to Wellington Hospital I was very lucky a doctor was available because I needed an injection that had to be given by a doctor So I was lucky That day

Now What WOULD HAVE HAPPENED with my partner if the doctor was. Not available We would have to Travel 55km to Dubbo Hospital. would have been fatal for many Partners We would like you to discuss in your Parliament

Young doctors what not needed in Sydney

Should have to come to Regional Areas what are also Australians what live there

For Three to Five Years ,

SO WE HOPE YOUNG DOCTORS WON'T GET AN PRACTICE NUMBER FOR SYDNEY area where enough doctors are available.

Thank You

Thornton. Brown
