What a terrible Hospital system we have in Cobar, our local stories are horrific.

We have doctors in Cobar that cannot treat their patients in our own hospital.

For gods sake, this has to stop... How many people have to be traumatised before changes are made. Very ill people being sent home when they should be helped...

We have had deaths that could have been avoided... at the moment and for a long while it's not a hospital... just a Transfer station
