We would like the Government to acquire all open spaces including E&R and be compensated fairly in a timely matter and NOT BE STERILIZED. Including land for transport corridors ... we should be compensated for the loss and disruption to the lives of our entire family

Our families have been living in limbo for the last 5 years first with the northern rd to come through our home and now the M9 with no said date of when 10 acres and home lost to the road with no consultation and with no answers and no reply to our submission

We need answers!!
