Partially  
Confidential

Dear Sir or Madam, I am writing to you today as I totally support this Parliamentary inquiry and strongly believe that all land owners within the Western Sydney Aerotropolis need to be treated and compensated fairly. Our property at [redacted] Bringelly borders with the Aerotropolis Government land and our property has been zoned 100% mixed use and there is no flood affecting our land...yet we have been turned into parkland under the Draft Precinct Plans. This is not fair as we believe our property is 100% developable. In fact our whole street is being turned into park land. We are concerned that too much parkland is incorporated in the Precinct plans and are afraid the Government will then resell our properties and make profit which would be so wrong. This is about our homes and livelihoods and our future. There is so much uncertainty with our future and all we want is answers to our questions but no one from our Government can give us these and refuse to come and speak with us. One minute you think your property is safe and the next with a stroke of a pen it's all gone terribly wrong. If the Government is going to acquire our land and homes it needs to explain and justify these decisions to all those affected. The Government also must ensure that it does not acquire more land than what is required and ensure that land owners are treated and compensated fairly. We feel the Government is taking advantage of us small land owners and we are not happy about the lack of communication with affected residents. We only want what every Australian land owner wants and that is to be paid fairly for our property. When we purchased our land it was prime real estate and that's how it should remain. Ultimately we just want to move on with our lives and be able to purchase what we have here in Bringelly.....somewhere else.
