**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Miss Laetitia Blanc

Date Received: 15 March 2021

I am deeply concerned about Kangaroos' welfare as there is no law to protect these magnificent creatures who are the SYMBOL of Australia. Therefore you should be very grateful to have them on your land and learning how to cohabit with them. A bill has just been done by America to stop selling the parts of the Kangaroos' body to make soccer shoes. I would also suggest that they should not be eaten as well! I am shocked that you can find Kangaroos meat in France while Belgium stopped selling it! We must preserve these beautiful Animals, because we don't need their meat or their body part to make accessories. Especially after what's had happened to them in the wildlife, they already suffered a lot and we should be helping them out instead!
