No 19**

**INQUIRY INTO HEALTH AND WELLBEING OF  
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH  
WALES**

**Name:** Ms Jemma Meecham

**Date Received:** 23 March 2021

---

Dingoes are not aggressive to humans. They are victim to appalling gov-funded baiting, trapping, "wild dog" fencing & hunting bounties. Most horrific of all, dingoes are routinely killed with the use of 1080 baiting, which causes a slow, painful death so cruel that the poison is banned in most developed countries.

We ALL know that humans are encroaching into their natural territory & we must be respectful when these gorgeous creatures become confused & frightened. In an educated civilised society we MUST do better. Our wild animals are entitled to live safely in their own homes & cruelty is NEVER justified.
