**INQUIRY INTO HEALTH AND WELLBEING OF  
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH  
WALES**

**Name:** Ms Tatiana Chaschina

**Date Received:** 26 March 2021

---

Culling kangaroos in Australia is unacceptable in our day and age where there are other more beneficial and humane methods of wildlife control available.

They are Australia's national emblem and need to be protected.

They attract tourists from all over the world coming to admire and appreciate this gentle animal.

Their habitat needs to be protected from commercial farming with their introduced species, rather than culling the native Australian species.
