**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Ms Jan Spencer

Date Received: 9 April 2021

The Western Harbour tunnel is not an appropriate development. The risk of pollution from dredging is too great. The funnelling of traffic into the inner city and across to the dense north Sydney is inappropriate. We do not need three harbour crossings from the city/Balmain. Please look at Sydney as a sustainable city and provide world class public transport, ring roads instead of funnelling into the central areas, and limit private cars in built up city work areas (city, and other works hubs like Parramatta, Chatswood etc)
