**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mr Richard Stanford

Date Received: 1 April 2021

To Whom it may concern, All native wildlife should be protected, kangaroos included. It is shameful that kangaroos and koalas are decreasing in numbers, due to destruction of habitat. There are many more, less obvious species under threat too. Grasslands and forests need to be protected.
