**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Dr Hedy Bryant

Date Received: 1 April 2021

Inquiry into declining numbers of kangaroos in NSW (Australia)

In 2016-7 I worked with Ray Mjadwesch on the relocation of kangaroos from Mt Panorama in Bathurst. As a former wildlife ecologist working on vertebrate pest research for NSW Agriculture I understood the population statistics which Ray was using to chart the significant decline of Kangaroos. This is an important inquiry as it is an opportunity to address the decline of one of our iconic unique species before it's too late.
