**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mr Robert Nowak

Date Received: 3 April 2021

“We have all these studies saying there are twice as many kangaroos as humans,” he says.

“But look around—they’ve disappeared from the landscape. People only notice where they are. They don’t notice where they’re not.”

Over the past 200 years, he says, “kangaroo management has meant kangaroo shooting. We need a reset on that philosophy.”
