**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Name suppressed
Date Received: 15 April 2021

Partially
Confidential

Dear Government What are the true 2021 numbers per kangaroo species left after drought and bushfires and culling? Why are so so many culled every year? What safeguards are that culling is humane, that is dead with the shot and killing of the babies by whacking against objects etc. doesn't occur or left alive to die slowly? As kangaroos are a native herbivore and do not destroy native habitats. They should not be culled. I believe it's a barbaric act by pastoralist who do not practice good land management practices, redneck thugs and government agencies allowing profiteering of corporations eg Macro food for Woolworths, Nike and other multinationals. Shame on our Government and the thugs that are destroying another native animal found nowhere else on earth but Australia and many of you call yourselves Christians. You are murderers of an iconic species. Eventually they will follow the same path as our endangered native species and extinct species.

Yours Sincerely
