**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mr Phillip Hawkes

Date Received: 20 April 2021

Reading this made me sick. We should ban macropod culling and hunting for a period no less than 2 years, in order to [a] allow these iconic animals time to recover from natural disasters, and [b] undertake an accurate census count of stock so that the debate about numbers, by region, has scientific evidence behind it.
