**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Ms Maria Mura

Date Received: 22 April 2021

After the worst drought and bushfires known in historical Australia. After habitat destruction and farming...we are losing not only Grey and Red kangaroos but smaller rare macropods. I want commercial hunting and culls to cease immediately and protections put in place to save out national symbol our unique kangaroos. I am very unhappy with the lack of care my governments have shown towards kangaroos. This is my submission Regards Maria Mura
