**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Miss Angelice Breviario

Date Received: 23 April 2021

I would like an inquiry to be made about one of our main national symbols, the kangaroo. I am concerned that the culling is based on poor research and that the culling itself is unethical. Have confounding variables such as the bushfires been accounted for? Has the psychological impact of humans consistent use of aggression on animals been looked into as a risk factor for depression or further violence against humans? What is the cullings impact on indigenous communities-what do they have to say?
