**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mr Eli Catto
Date Received: 24 April 2021

As a fulltime professional kangaroo harvester I think this game should go on.

Many blokes and girls rely on culling the roo to live and support their family.

The drought has had an impact on the kangaroos but the numbers are still out there. The damages they cause is unstopable.

No matter what the government decides people will still cull the roos. So why not keep it in the food chain
