**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mr Christopher O'Donnell

Date Received: 24 April 2021

It's ludicrous to think that we are butchering these "Native" animals.

There's no logical reasoning behind the mass slaughter.

It's "Blatantly" obvious that they are massacred for profit.

Yet if you stop and think for a minute.

You are shooting yourselves in the foot. As you are being watched by a GLOBAL AUDIENCE.

So you might want to stop and think wisely. If you value your tourism dollar and the ENTIRE tourism industry. Then you might want to think of the damaging impact you are having as we are gradually being looked upon as the cruelest nation on earth,

It's pure insanity to rave on about kangaroos damaging our land. If that was even slightly possible, don't you think we'd be living in a dust bowl, a wasteland after having kangaroos here for MILLIONS of years.

We need to wake up, grow up, stop listening to the narrow minded minority, and understand that the vast majority of the world's population is condemning Australia's pathetic excuses and polite terms such as harvesting "like we are harvesting kangaroos as they fruit from trees" for brutality killing these innocent creatures.

You are slashing the throat of the future of your own children. If you think you are building a great nation, boy oh boy, haven't you seriously lost the plot.

Just know you are being watched by global audience, the world watched on in horror throughout the entire fire crisis, now it looks on in horror as we are supporting the largest land based mass slaughter on earth.
