**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mrs Carolyn Baldwin

Date Received: 25 April 2021

I believe that the macropods in Australia are being unnecessarily killed. For the most part, this is cruel slaughter.

I believe the kangaroo meat industry must be stopped for 2 reasons.

1. Because it includes animal cruelty in the way babies are disposed of which is often bludgeoning to death. Also there are injured animals shot and left to die a slow painful death.
2. Because the meat is unsafe, with high levels of bacteria. This is a public health issue and must stop.

Please stop the slaughter of our beautiful macropods and give them the proper protection which they require.

Gone are the days that governments are going to get away with putting profits before the health of our people and the future and safety of our unique wildlife.

Thank you for reading and carefully considering this matter.

Carolyn Baldwin
