**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Ms Lisa Siciliano

Date Received: 26 April 2021

I strongly Oppose the commercial killing of kangaroos.

The accuracy of population counts, Is questionable with no recent figures supplied to support killing quotas. There is no data on the number of kangaroos killed in the 2019/ 2020 bushfires.

There is no process of assessing how many are killed by those holding the “licence to kill” the killing of joeys Is barbaric.

the use of exclusion fencing Is decimating wild kangaroo populations

threats to kangaroo habitat including land clearing, bushfires, climate change and drought are compounded when on top of all this you allow commercial killing. I have property in Barham and observations clearly show a reduction in kangaroo numbers . 10 years ago I would be lucky to have mins of up to 20 kangaroos in the front paddock. Now I’m lucky to see 2.
