

**INQUIRY INTO WASTE AVOIDANCE AND RESOURCE
RECOVERY AMENDMENT (PLASTICS REDUCTION)
BILL 2021**

Name: Ms Christina Bentham

Date Received: 27 April 2021

In regards of the reducing the use of single use plastics .

. Why not abolish them we are ourselves breathing in breakdown materials . . We speak of entanglement in science and think we are advancing technologically yet here we are entangling animals in the sea and on land that is not progression so far all that has been done is enable the merchants to profit by selling plastic bags and raising the price of plastic bags for rubbish . . How can we back pedal in our treatments of animals and land whilst trying to call ourselves advanced . . If it wasn't so sad it would be laughable . .

Why can't technology come up with something more advanced regarding rubbish disposal in this day and age . . No more Murphy's please just humanity to all us animals . .
