

**INQUIRY INTO WASTE AVOIDANCE AND RESOURCE  
RECOVERY AMENDMENT (PLASTICS REDUCTION)  
BILL 2021**

**Name:** Mrs Carolyn Baldwin

**Date Received:** 27 April 2021

---

Please accept the Bill to reduce the use of single use plastics.

It is common knowledge that single use plastics are a massive pollution problem and not reducing and stopping their use is negligent at this time.

Our oceans are polluted with plastic, and when tested our wildlife and people are showing microplastics in their bodies.

If this matter is not addressed then things are going to go from bad to worse.

There are alternatives to single use plastics and I strongly urge you to take every step that you can to eliminate them.

Money is not an acceptable excuse to keep using products that are harmful to people, the environment and animals.

Our world has become a garbage pit for human waste and eliminating single use plastics will be a step in the right direction.

With thanks

Carolyn Baldwin
