Confidential

I Acknowledge & Pay Respect to the Dughutti Elders Past ,Present & Future.The traditional owners and keepers of Knowledge of land area and wider areas of the Mid North Coast .N.S.W. 2440

Submission..to inquiry of N.S.W.State Government into Kangaroo,and other macropod marsupial species.

That Pandemics ,zoonotic and other diseases are intrinsically linked to human and non human sentient species interaction,specifically in the case of the injuring ,killing of Kangaroo and other Macropod Marsupials in N.S.W. and all states of Australia. Bio-diversity degradation,localised extinctions, forced migrations of depleted and compromised populations of Kangaroo and other Macropod Marsupials of all description ,that can no longer occupy or exist in those places to which they exquisitely ,uniquely,been evolving,for no less than 60million years. A reconnection with a basic moral ,ethical,empathetic and enlightened state of mind of decision makers ...those in positions of power.That laws created to control these interactions need be totally revised,reviewed or abandoned in some areas as they are a reflection,only of a distorted communication & implicit assumptions embedded in historical narrative of Australia from circa 1770s,A dysfunctional Constitution ,which fails, acknowledgement and recognition of all indigenous matters,and holds bias toward favouring the ever increasing global economic trade 2021.at the cost of all Bio-diversity,naturally occurring indigenous ,plants ,trees and species ,specifically in N.S.W. Kangaroo and other macropod marsupials....That all previous pandemics have followed natural laws directly in re-active response to human /non human sentient interactions,and human action on the natural environment.The language used in the restructure, reformation of non/human sentient welfare basically must communicate & convey, at all times the sentience, of all non human species .The culture humans create and sustain around human perceptions exist in language,a pervasive blurring of reality as communicated,can profoundly influence perceptions and behaviours of humans towards/upon non human sentients.) Insights to forming a new framework,must be sought ,and given equal weight and standing from,non human sentient species behaviourists,on ground experiential knowledge holders,biologists,physicists, social theorists,philosophical,cognitive science,anthropologists,indigenous culture practice and knowledge, there exists a clear imbalance weighted toward economic/ financial systems (technically these systems are non living,non sentient,and infinite and the use of those systems in the exploitation of natural resources and non human sentient species ,which are finite and declining extinctions of non-human sentient species,at all trophic levels,currently humans are experiencing and face future of extremes,socially,climatically,environmentally ,alongside and not in isolation from all non human sentients.

New measures and frameworks,must be based in radically new concepts and organisations which will act, truthfully and transparently for the freedom from suffering and wellbeing of Kangaroo and other macropod marsupials, all are sentient species.World wide 6x extinction event is in play, Kangaroo and other macropods ,all marsupial species indigenous to Australia are under threat . It is sincerely hoped that Government and Inquirers will not fail them and expediate their extinction,by a retrograde,reversion to the rusted on praxis of old regimes and concepts.Concern for the welfare and freedom from cruelty for non human sentients,is at unprecedented levels and rising in human sentiment and the need for seen to be done is more pressing than ever.Delays (justice delayed is justice denied),obfuscation ,must be identified . Organisations or lawmakers ,who vested with the power to prevent cruelty to and ensure the welfare of non human sentients,do not and have not done so effectively.... by being re/active rather than pro active in that role.It is counter intuitive ,obvious that many organisations exist and continue to exist, by not arresting or preventing,that purpose for which they were created.Have diverged,from their initial ideological cause and purpose,

to become participants in the ongoing cycle whether by accident , design or convenience.It is incomprehensible that an organisation such as the R.S.P.C.A. prescripts the physical bludgeoning of baby Kangaroos and other baby macropods..This is a D.S.M.1v...listed psychiatric psychopathic syndrome ,„Zoosadism ,...Financial support in exchange for favourable reputational sponsorship,to maintain the status quo(by specific corporations,vested interests in Profit making from SENTIENT Species killing, harming and injuring) towards investigative overseers must be viewed as circumspect.and contributes to the continuing cycle .Many of the charitable organisations, are conceptual only ,they are in fact operated as a business with charitable status applied.Thankyou for reading my submission to the N.S.W. State Government Inquiry into...Kangaroo and other macropods (marsupials)
