**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Ms Mary Curran

Date Received: 29 April 2021

I wish to object to the WHT for a number of reasons, the main one being that no proper economic rationale has been provided. I am in favour of public transport, like the metro. I object to the loss of public land in NS LGA.

I object to the unfiltered stacks as air pollution is cumulative in the body and no proper studies have been done. In particular there should be no stacks near schools.

I object because the current plan will cause even more traffic along Berry Street and NS will be trisected by very busy road and hence will not be pedestrian friendly. Many intersections ie Bay Road, will become 'fail'.

I object because of the disruption to the toxic substances on the harbour floor, which cause ill effects to marine life.

I object because not one person I have spoken to us supports WHT.
