

**INQUIRY INTO WASTE AVOIDANCE AND RESOURCE
RECOVERY AMENDMENT (PLASTICS REDUCTION)
BILL 2021**

Name: Ms Fiona Scott
Date Received: 2 May 2021

Submission to Parliamentary Bill Committee
Legislation to BAN Single-Use Plastics - Plastic Takeaway DOME Drink Lids

Dear Sir/Madam,

A recent submission to Queensland Parliament to have unnecessary & deadly Takeaway Plastic Dome Shaped Lids banned was sadly unsuccessful in being included in the first wave of bans. I submit this to you now in the hope that you will identify the horror of the prolonged suffering & death they cause to innocent wildlife & please include them in the first tranche of bans for New South Wales.

It's heartbreaking how human convenience is devastating wildlife. This critical issue must not be ignored any longer, please help.

Dome Lids are rife in the Fastfood, Takeaway and Cafe Industries. I find them discarded everywhere. Every day I pick up Dome Lids, Ring Seals and other dangerous items off the beach, in community playgrounds, parks, roads, shopping centre car parks, etc. I take them home and cut them in half before responsible disposal. I don't do it for the litterbugs, or for me, I do it for our vulnerable wildlife. Sadly we can't change some people's abhorrent behaviour, but if these dangerous items didn't exist, they can't be littered.

The Government must act now to ban these unnecessary and lethal Dome Lids. I recognise that Plastic Ring Seals (also deadly) will take a much longer timeframe to BAN as they are found under an incredible array of products, but I see no reason to delay BANNING Dome Lids.

We (myself and my 3500+ Petition Supporters to date) state that Dome Shaped Lids 100% fit the criteria to ban now i.e.

Readily available alternatives to deadly Plastic Dome Lids are existing Plastic Flat Lids, which at least, being made of flexible plastic, can be torn with hands (giving wildlife a chance of escape after entrapment).

Dome Lids use can be totally avoided in the first place as they are superfluous and completely unnecessary to drink a drink.

If toppings i.e. cream and sprinkles are requested, a deeper cup can be used to accommodate this and a flat lid be used.

Dome Lids can only be cut with scissors and as such are a cruel death sentence to wildlife.

Ultimately our goal is a total ban. In the meantime, education is essential. My message is: Say "No Lid, Thanks". If you must use one, or see one littered, cut it in half with scissors and dispose of it responsibly (Dome Lids rigid plastic and sharp inner edge can not be torn with hands. If a bird or small animal is caught, it's guaranteed a slow and painful death sentence either through strangulation or starvation).

Until people are made aware, they have never considered the dangers of entrapment to wildlife from Plastic Dome Drink Lids, Plastic Ring Seals, Rubber Bands, Hair Ties, etc and now Face Mask loops are also in the mix. This is about a kinder planet for all living things on land, sea & sky. We must be their voice.

Your New South Wales Government is now calling for submissions, and while I welcome and support a ban on any Single-Use Plastics and Polystyrene, in my opinion, Plastic Dome Shaped

Lids and Ring Seals are far more fatally detrimental to wildlife than other items Queensland chose to ban first, e.g. plates and bowls. I don't understand why Dome Lids weren't banned alongside these items at the very least.

Please BAN Dome Lids alongside Straws, Stirrers, Cutlery and Plates now. Any further delay means certain suffering and cruel deaths to more innocent wildlife.

I invite you to please read my Petition, all Updates and read my suggestions for alternatives to Lids and Ring Seals <http://chnng.it/w82TGW9TDp>

I encourage you to also visit Australian Wildlife Society's "Snip Rings for Wildlife" Campaign which deserves considerably more attention <https://www.aws.org.au/snip-rings-for-wildlife/>

If just one State bans these lethal & totally unnecessary Dome Drink Lids, surely the rest of Australia, and the world, will follow. I would have been so proud if my home state of Queensland were the first, but will it be New South Wales who step up?

Thank You for your time

Fiona Scott
