**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Miss Laetitia Blanc

Date Received: 21 March 2021

Kangaroos are the symbol of Australia and you should be grateful for it!
Behind each creature there is a reason!
Each Animals play an important role in the Ecosystem!
No need for Kangaroos meat, No need for their skin and no need for culling them Either or
having those cruel fences to kill them, How shocking!
As they do not breed a lot!
By 2021 people should know by now how to cohabit with this magnificent and funny
creature. Are you telling me that your children won't be able to see them?
Carry on killing Animals and humans will be the next race to go Extinct!
Kangaroos has already suffered a lot because of the huge wildfire caused by human made climate
crisis!
There is no planet B to move to and your piece of paper won't be able to save us!

Be Reasonable and Protect the Kangaroos.
Don't Let them Down.
Laetitia Blanc.
