**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Ms Cheryl Milloss

Date Received: 6 April 2021

I am South Australian but write to support the Animal Justice party of NSW un submission to protect Kangaroos in NSW.

As a native iconic species of Australia they need our protection as are forced to survive in smaller and smaller spaces as their habitat is carved up into unconnected pockets rather than continuous corridors and they are persecuted for being too many in areas that once supported them in abundance.

FARMING needs to change to allow them to co-exist with farmed animals not exclude and urban areas should be planned to include them by allowing corridors and large areas to remain to support their species.

Labelling them as overabundant due to human encroachment and mismanagement is not ok.
